Fluid Level Measurement
Fluid Level/Temperature Gauges
Reservoir Equipment

A proven solution for tank oil level measurement

Universal fixing designed for front or rear tank mounting

Fluid level/temperature gauges are available in 3 sizes each with 2-hole mounting at 76mm, 127mm and 254mm mounting centres. The high-visibility viewing lens is a one-piece design for added security, moulded in shatterproof, transparent polyamide.

Product Features:
- 3 sizes of fluid level/temperature gauge. 2 hole mounting.
- 76mm, 127mm and 254mm mounting centres.
- A one-piece design, high-visibility viewing lens for added security.
- Moulded in shatterproof, transparent polyamide.
Specification

For ‘through hole’ mounting:

<table>
<thead>
<tr>
<th>Hole size</th>
<th>M10</th>
<th>M12</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preferred</td>
<td>11.0</td>
<td>13.0</td>
</tr>
<tr>
<td>Maximum</td>
<td>13.0</td>
<td>14.0</td>
</tr>
</tbody>
</table>

Torque = 10Nm max

For tapped holes:

Holes to be tapped square to mounting face.
Tolerance on hole centres: +0.5, -0.2

For welded back nuts:

The above details should be combined.

Installation and Application Information

Simple to Install

The universal fixing is designed for either front or rear fixing. Just two holes in the tank – threaded for front fixing – and the gauge is ready to install. After positioning the gauge the bolts are simply tightened to provide a secure seal. There is no fear of leakage with the square section seals and the two-point mounting system eliminates problems with tank distortion. M10 and M12 bolt thread options are available.

Easy to Read

The high-visibility lens is one-piece for added security and moulded in shatterproof, transparent polyamide for an accurate and clear oil level and temperature indication. Further gauge protection is provided by a specially designed shroud moulded in high-impact, black polystyrene.

Reservoir Float & Level Switches
Reservoir Equipment

Cost effective reservoir solution

Float switches designed for on-site adjustment

A range of high quality, adjustable float switches. A reliable design using reed switches and available in 3 lengths – 500mm, 1000mm and 1500mm. Additionally a capacitive level switch is available designed to detect the loss of fluid below its position in the tank.

Product Features:

- Adjustable float switches – 3 lengths available.
- Capacitive level switch designed to give a low level alarm.
- High quality, adjustable float switches available in 3 lengths – 500mm, 1000mm and 1500mm.
- Capacitive level switch – rugged construction, simple to install and with no moving components.
- Cost effective reservoir solutions with many applications.

FL Series
Adjustable Float Switch
Reservoir Equipment

Features & Benefits

The FL Series is a range of vertically mounted, single float level switches operating on the proven reed switch and magnet principle.

The FL Series float switch can be tailored by the user for a particular application, by adjusting the length of the float switch tube. It is also possible for the user to select the switching configuration by inverting the float, giving either open on rise or close on rise operation.

The unit is supplied part assembled, with detailed instructions for the user to complete assembly to the specifications of the application and to install the unit.

Typical Specification

| Installation | Mounting: 1" BSP threaded header | Gasket: 2.0mm thick sealing washer | Length: Adjustable up to 1500mm |
| Electrical specification | Supply voltage: 240 Vac maximum | 300 Vdc maximum | Switching current: 0.5A |
| Material specification | Header: Brass | Stem: Brass | Float: Polypropylene | Gasket: Klingsersil grade C4324 to BS7531 grade Y |
| Other parameters | Fluid types: Any liquids compatible with brass and polypropylene |

Float Switch Features Include:
- Float switches can be adjusted on site
- Reliable design using reed switches
- 3 lengths available, 500mm, 1000mm and 1500mm

The FL Series is designed to be adjusted by the user to fit their tank. The unit consists of a stem with the reed switch and float already set in position. The customer can cut the stem to fit their tank, and assemble it to the header. The unit is then ready to be fitted to the tank.

The unit has a factory set “Open On Rise” switching configuration, but this can be changed by reversing the float.

Note: FL Series switches supplied as loose parts so no IP class applies. If assembled correctly by the customer, the IP class is IP67.

Parker Hannifin
Hydraulic Filter Division Europe
FDHB500UK/Reservoir
The **CLS46 Liquid Level Switch** is an active device which is designed to give an alarm signal if fluid falls below a preset level. It will only give an output signal after a few seconds of low level to eliminate false alarms due to turbulence. The fact that the **CLS46 Series** has no moving parts and incorporates a built in delay means that it is ideal in applications where mechanically operated switches mis-trigger due to vibration and fluid turbulence.

The **CLS46 Capacitive Level Switch** is designed to detect the loss of fluid below its position in the tank.

The **CLS46 Series** has no moving parts and it is therefore suitable for all applications, particularly where space and access inside a vessel is at a minimum.

The **CLS46 Series** compliments the existing range of level measurement instrumentation supplied by Parker Hannifin.

### Technical Specification

Dimensions:  
See drawing

Electrical rating:  
Supply voltage: 7-40 Vdc  
Supply current: 3.0mA  
Max. load current: 1.0A  
Alarm delay time: 10.0 seconds

Connections:  
V+: Positive power supply  
GND: Negative power supply or GND  
Output: Transistor switched to GND on alarm  
Test: Ground to operate  
Body: Connected to ground

Fluid types:  
Mineral oils, typically used in engines or hydraulic actuators compatible with brass, PTFE and NBR.

Construction:  
Body: Brass  
Probe: PTFE  
Terminals: SAE CA210 brass, tin plated  
Seals: NBR  
Connector: 30% glass filled nylon 6

Environmental ratings:  
Max. pressure: 5.0 bar (72 PSI)  
Temp. ranges: Fluid: -40°C to +130°C  
Ambient: -40°C to +100°C  
Storage: -50°C to +140°C  
Sealing: IP67  
Vibration: 6g 10-50Hz (600-3000rpm)  
Shock: 50g, 6.3mS  
Weight: 53g

### Installation Details

![Installation Diagram]

1. 38° thread cover
2. 1/2” BSPT thread
